Third-year Information Technology undergraduate at the **University of Moratuwa** seeking a **Software Engineering Internship**. Experienced in developing full-stack web and mobile applications using **React, Next.js, Flutter, Node.js, Express.js, MongoDB** and **MySQL** through team, company-mentored, and personal projects. Comfortable working with Git and GitHub in team-based development environments, with a strong interest in software engineering, full-stack development and building practical web-based solutions.

- React/Next.js
- Typescript
- Postman (API Testing)
- GitHub
- Nodejs / Express.js
- Python
- Mobile App Dev (Flutter)
- Figma
- MongoDB
- HTML5/ CSS3/ Tailwind
- AWS
- MySQL

EDUCATION | CERTIFICATIONS

B.Sc. (Hons), Information Technology & Management | [University of Moratuwa](#) (Moratuwa, Sri Lanka)

2024 – Present (Expected to 2028)

Relevant Coursework: Software Engineering | Object Oriented Programming | Database Management | Statistics | Data Structures & Algorithm

D.S. Senanayake National Collage, G.C.E. Advanced Level - Physical Science (Combined Mathematics, Physics, Chemistry) | (Ampara, Sri Lanka)

2020 – 2022

Certifications, AWS [Cloud Practitioner Essentials](#) | AWS (*In Progress*)

TECHNICAL EXPERIENCE

PROGRESSIVE WEB APP FOR INTEGRATED POS & E-COMMERCE SYSTEM | **Group Software Project – Mentored by Eutech Cybernetics** OCT 2025 – AUG 2026

- Designed and built the **Order Management, Checkout, and Reports modules** for a cloud-based, multi-tenant Progressive Web Application (PWA) that unifies a Point-of-Sale (POS) system with an e-commerce platform.
- Developed a comprehensive multi-step checkout wizard covering customer information, delivery selection, and payment initiation, successfully integrating the PayHere.lk payment gateway for secure digital transactions.
- Built core transactional and analytical **RESTful APIs** to manage the full lifecycle of a sale, including order creation, shipping logistics, and administrative status updates.
- Designed and managed tenant-isolated **MongoDB** Atlas collections for orders, order items, shipping addresses, delivery methods, and payments.
- Created an interactive Reports Dashboard to provide business stakeholders with **visual analytics** on sales performance, inventory levels, top-performing products, and customer trends.
- **Technologies:** Next.js, Node.js, Express.js, MongoDB Atlas, Tailwind CSS, JWT, AWS (EC2, S3), PayHere.lk API.

CRICKET MANAGEMENT & LIVE SCORING PLATFORM | **Group project** AUG 2026 - PRESENT

- Developed **Match Management and Scheduling** features for configuring cricket fixtures, selecting competing teams, assigning venues, defining match formats (T20, One Day, and custom overs), and managing match lifecycle states.
- Implemented **Tournament Management and Standings** functionality to organize multi-team tournaments, manage group and knockout stages, generate fixtures, and automatically calculate **wins, losses, points, and Net Run Rate (NRR)**.
- Developed **Player Analytics and Leaderboards** to aggregate player performance data and rank top performers based on **runs, wickets, batting average, and bowling economy**.
- Integrated frontend modules with **REST APIs** to retrieve and manage matches, tournaments, player statistics, and standings.
- Designed responsive and interactive **Next.js/TypeScript interfaces** for match fixtures, tournament points tables, player statistics, and leaderboard views.

- Worked with relational data models involving **players, teams, matches, ball events, and tournaments** to support statistical aggregation and real-time cricket analytics.
- **Technologies:** Next.js, TypeScript, Spring Boot, PostgreSQL, REST APIs, WebSocket

AI MARKETING AGENT | Solo Developer

SEP 2026 - PRESENT

- Developing a **multi-tenant SaaS platform** that analyzes customer reviews and helps businesses generate AI-assisted responses and marketing insights.
- Built secure **FastAPI authentication and user registration APIs** with password hashing, validation, and PostgreSQL integration.
- Designed a scalable architecture using **Next.js, FastAPI, PostgreSQL, Celery, and Redis** for frontend, API, data persistence, and asynchronous processing.
- Integrating **Google Business Profile API and OAuth 2.0** to synchronize business reviews and support owner-approved response publishing.
- Implementing **Gemini-powered sentiment analysis, topic extraction, response generation, and actionable customer-feedback recommendations**.
- Developing review analytics to identify **customer sentiment, recurring complaints, positive feedback patterns, and business improvement opportunities**.
- **Technologies:** Next.js, TypeScript, FastAPI, Python, PostgreSQL, Celery, Redis, Gemini API
